RE: AB 634 - Support

Dear Senator Corbett,

As an avid ocean sport enthusiast and citizen concerned with ocean conservancy, I would like to express my full support for Assembly Bill AB634. This bill will enable the State and local jurisdictions to participate in the placing of these man-made reefs, beneficial to the economy and the environment, free of the liability for injuries that might occur to persons diving on these reefs. I believe that artificial reefing can provide great benefits for ocean conservancy, economic benefits for businesses providing services to ocean enthusiasts, and viable alternatives for disposal of decommissioned military or retired commercial vessels.

I support AB634 and ask you to help assure that it passes through the State Legislature.

Sincerely,

*your name here*
